INDEX

Adrenaline equilibrium, effects of vitamin-deficient diets on (Gross) 569
Algae, marine, significance of ash content of (Haas and Russell-Wells) 696
Allantoin excretion of hybrids of Dalmatian hound (Onslow) 334
Allantoin excretion of offspring of Dalmatian hybrids (Onslow) 564
Amino-acids, absorption spectra of some (Ward) 898
Ammonia, estimation of, in urine (Levy-Simpson and Carroll) 391
Ammonia, method for rapid removal of, in quantitative estimations (Stanford) 847
Ammonia of blood in nephritis (Russell) 72
Anaemia, following haemorrhages in rats, influence of diet on occurrence of (Scott) 157
Anaemia, studies in (Scott) 157, 166
ANDERSON, G. H. The inorganic phosphorus content of the blood of normal children. (Preliminary communication.) 43
Antenatal feeding, effect of, on offspring in rats (Korenchevsky and Carr) 597
Antiscorbutic factor, alleged specific colour reaction for (Kay and Zilva) 872
Antiscorbutic factor of lemon juice, oxidation of, influence of reaction on (Zilva) 410
Antiscorbutic preparations, conservation of potency of (Zilva) 416
Ash content of marine algae, significance of (Haas and Russell-Wells) 696
Azine and azonium compounds of proteolytic enzymes (Marston) 851
AZUMA, R. and HARTREE, W. The absence of effect of insulin on the heat production in isolated frog's muscle 875

Bacteria, influence of surface tension on growth of (Wolf) 813
Bacterial nutrition (Whitehead) 742
Bactericidal action of tellurium derivatives of diketones (Morgan, Cooper and Burtt) 30
BARGER, G. and WHITE, F. D. The constitution of galegine 827
BARGER, G. and WHITE, F. D. Galuteolin, a new glucoside from *Galega officinalis* 836
Barley, germinated and ungerminated, maltase in (Ling and Nanji) 593
BEZSSONOFF, N. A simplified method of preparation of the Bezssonoff reagent for vitamin *C* and some polyphenols 420
Blood, ammonia content of, in nephritis (Russell) 72
Blood, calcium content of, during pregnancy (Widdows) 34
Blood constituents, relation of, to deficient diet (Thompson and Carr) 373
Blood enzymes (Compton) 536
Blood, estimation of choline in (Sharpe) 41
Blood, estimation of sugar in (Calvert) 117
Blood, fluidity and coagulation of the (Pickering and de Souza) 747
Blood, hydrogen ion concentration of, accuracy of Dale and Evans method of determining (Taylor) 406
Blood, inorganic phosphorus content of, of children (Anderson) 43
Blood, in pathological conditions, hydrogen ion concentration of (Parsons and Poulton) 341
Blood-sugar, nature of, the (van Creveld) 860
Bones, calcification of, relation of quantity of fat-soluble factor in diet to degree of (Goldblatt) 298
BRADFORD, S. C. On the theory of gels. IV 230
Bromoxylenol blue (Cohen) 535
BURTT, A. W., *see* MORGAN, G. T.
BUSTON, H. W. and SCHRYVER, S. B. The isolation from cabbage leaves of a carbohydrate, hitherto undescribed, containing three carbon atoms 470
BUTLER, W. and COSTE, J. H. Seasonal variations in the dissolved oxygen content of the water of the Thames Estuary. (With special reference to the phenomenon of supersaturation.) 49

Cabbage leaves, isolation of new carbohydrate from (Buston and Schryver) 470
Calcium assimilation in growing pig, influence of oils on (Husband, Godden and Richards) 707
Calcium, colloidal and ionic, variations in, in experimental tetany (Cruickshank) 13
Calcium content of blood during pregnancy (Widdows) 34
Calcium, distribution of, in plasma and cells in experimental tetany (Cruickshank) 13
CALVERT, E. G. B. Estimation of sugar in the blood 117
Carbohydrate metabolism in yeast (Smedley MacLean and Hoffert) 720
Carbohydrate metabolism, studies on (Hutchinson, Winter and Smith) 683, 764
Carbohydrate, new, from cabbage leaves (Buston and Schryver) 470
Carbon-content of solutions, estimation of (Needham) 431
Carnosine, distribution of, in muscles of cat (Mitsuda) 630
CARR, I. L., *see* THOMPSON, T. J.
CARR, M., *see* KORENCHEVSKY, V.
CARROLL, D. C., *see* LEVY-SIMPSON, S.
Cerebrospinal fluid, precipitation of colloidal gum-benzoin by (Wright and Kermack) 658
Chickens and other birds, comparative vitamin *B* requirements of (Plimmer and Rosedale) 794
Chickens and other birds, vitamin *C* requirements of (Plimmer and Rosedale) 787

Chickens, rearing of, on intensive system (Plimmer and Rosedale) 772, 787, 794
Chickens, vitamin *B* requirements of (Plimmer and Rosedale) 772
Choline, estimation of, in blood (Sharpe) 41
CLAYSON, D. H. F. and SCHRYVER, S. B. The hemicelluloses. I. The hemicellulose of wheat flour 493
CLIFFORD, W. M. A heat-stable catalyst in animal tissues which destroys the iminazole ring and unmasks amino groups 549
Coagulation of the blood (Pickering and de Souza) 747
Cod-liver oil, influence of, on calcium and phosphorus assimilation in growing pig (Husband, Godden and Richards) 707
COHEN, A. Bromoxylenol blue. A true-neutrality point indicator 535
Colloids and haemolysis (Pickering and Taylor) 916
Colorimetry, improvements in (Stanford) 839
Colour changes in rats' fur produced dietetically (Hartwell) 547
Colpidium colpoda, rate of reproduction of, in artificial culture (Cutler and Crump) 174, 878
COMPTON, A. Blood enzymes. III. On the glycogenolytic activity of mammalian sera —with remarks on serum toxicity 536
COOPER, E. A. and WOODHOUSE, D. L. On the relations of the phenols and their derivatives to proteins. A contribution to our knowledge of the mechanism of disinfection. Part IV. The halogen phenols 600
COOPER, E. A., *see also* MORGAN, G. T.
COSTE, J. H., *see* BUTLER, W.
COWARD, K. H. The formation of vitamin *A* in plant tissues. II 134
COWARD, K. H. The association of vitamin *A* with the lipochromes of plant tissues 145
CREVELD, S. VAN. Some experiments and remarks on the possible transformation of *d*-glucose in the intestine and on the nature of blood-sugar 860
CRICHTON, A., *see* MCGOWAN, J. P.
CRUICKSHANK, E. W. H. Studies in experimental tetany. I. On the distribution of calcium in the plasma and cells. II. On the variations in colloidal and ionic calcium 13
CRUMP, L. M., *see* CUTLER, D. W.
CUTLER, D. W. and CRUMP, L. M. The rate of reproduction in artificial culture of *Colpidium colpoda* 174
CUTLER, D. W. and CRUMP, L. M. The rate of reproduction in artificial culture of *Colpidium colpoda*. Part II 878
Cystine, possible ring structure of (Ward) 898

Dalmatian hound, hybrids of, uric acid and allantoin excretion of (Onslow) 334
Dalmatian hybrids, offspring of, uric acid and allantoin excretion among (Onslow) 564
Darkness, effect of, on rats on normal diet (Goldblatt and Soames) 294
$\beta\beta'$-Dichlorodiethyl sulphide, rate of liberation of acid by (Peters and Walker) 260
Dichromate method, evaluation of purity of organic products by (Grey) 768
Diet, deficient, relation of blood constituents to (Thompson and Carr) 373
DUDLEY, H. W. The purification of insulin and some of its properties 376
DUDLEY, H. W. and MARRIAN, G. F. The effect of insulin on the glycogen in the tissues of normal animals 435

Electrolytes, penetration of, into gels (Stiles) 530
Enzymes of blood (Compton) 536
Enzymes, oxidising (Wheldale Onslow) 216
Enzymes, proteolytic, azine and azonium compounds of (Marston) 851

Fat metabolism in yeast (Smedley MacLean and Hoffert) 720
Fat-soluble factor of diet, relation of quantity of, to development of rickets in rats (Goldblatt) 298
Fat-soluble factor, supplementary value of light rays to diet graded in its content of (Goldblatt and Soames) 622
Fat-soluble growth-promoting factor, studies on storage and synthesis of, by rats (Goldblatt and Soames) 446
Fat-soluble vitamins, effect of irradiated air on growth of rats on a diet deficient in (Hume and Smith) 364
FEARON, W. R. Urease. Part I. The chemical changes involved in the zymolysis of urea 84
FEARON, W. R. Urease. Part II. The mechanism of the zymolysis of urea 800
Fermentation of sugars in presence of phosphate and sulphite (Hemmi) 327
FINDLAY, G. M. A preliminary note on the destruction of vitamin *B* by age 887
Fish, freshwater, respiratory exchange in (Gardner and King) 170
Fluidity of the blood (Pickering and de Souza) 747
FOX, F. W. and GARDNER, J. A. The sterol content of cow's milk 94
FROST, I. Artificial partheno-genesis in sea urchins. A note on an improved technique 418

Galega officinalis, galuteolin, a new glucoside from (Barger and White) 836
Galegine, constitution of (Barger and White) 827
GALLAGHER, P. H. Mechanism of oxidation in the plant. Part I. The oxygenase of Bach and Chodat: function of lecithins in respiration 515
Galuteolin (Barger and White) 836
GARDNER, J. A. and KING, G. Respiratory exchange in fresh-water fish. Part VI. On pike (*Esox lucius*) 170
GARDNER, J. A., *see also* FOX, F. W.
Gelatin, methods of purifying (Knaggs, Manning and Schryver) 473
Gels, diffusion of mixtures of chlorides in (Stiles) 530
Gels, penetration of electrolytes into (Stiles) 530
Gels, theory of (Bradford) 230
Glycogen of tissues, effect of insulin on (Dudley and Marrian) 435
Glycogenolytic activity of mammalian sera (Compton) 536

Glucose, possible transformation of, in the intestine (van Creveld) 860
Glucose subjected to intestinal mucosa of rabbit, polarimetric observations on (Stiven and Reid) 556
Glutathione, constitution of (Quastel, Stewart and Tunnicliffe) 586
Godden, W. *see* Husband, A. D.
Goldblatt, H. A study of the relation of the quantity of fat-soluble organic factor in the diet to the degree of calcification of the bones and the development of experimental rickets in rats 298
Goldblatt, H. and Soames, K. M. A study of rats on a normal diet irradiated daily by the mercury vapour quartz lamp or kept in darkness 294
Goldblatt, H. and Soames, K. M. Studies on the fat-soluble growth-promoting factor. (I) Storage, (II) Synthesis 446
Goldblatt, H. and Soames, K. M. The supplementary value of light rays to a diet graded in its content of fat-soluble organic factor 622
Grey, E. C. The evaluation of the purity of various organic products by the dichromate method 768
Gross, L. The effects of vitamin-deficient diets on the adrenaline equilibrium in the body 569
Gum benzoin, colloidal, mechanism of precipitation of, by cerebrospinal fluid (Wright and Kermack) 658
Gum benzoin, colloidal, properties of (Wright and Kermack) 635

Haas, P. and Hill, T. G. Observations on certain reducing and oxidising reactions in milk 671
Haas, P. and Russell-Wells, B. On the significance of the ash content of certain marine algae 696
Haemoglobin, osmotic pressure of, effect of carbon dioxide and acetic acid on (Wilson) 59
Haemolysis, colloids and (Pickering and Taylor) 916
Halogen phenols, relation of, to proteins (Cooper and Woodhouse) 600
Harden, A. and Robison, R. Note on the sulphuric acid test for liver oils 115
Harris, L. J. The basic dissociation constant of valine 693
Hartree, W., *see* Azuma, R.
Hartwell, G. A. Note on the colour changes in rats' fur produced by alterations in diet 547
Hartwell, G. A., Mottram, E. C. and Mottram, V. H. The technique of breeding rats for feeding experiments 208
Hemicellulose content of starches (Schryver and Thomas) 497
Hemicellulose of American white oak (O'Dwyer) 501
Hemicellulose of wheat flour (Clayson and Schryver) 493
Hemmi, F. The fermentation of glucose and fructose by dried yeast in the simultaneous presence of phosphate and sulphite 327
Hevesy, G. The absorption and translocation of lead by plants. A contribution to the application of the method of radioactive indicators to the investigation of the change of substance in plants 439
Hexosephosphoric esters, significance of, in ossification (Robison) 286
Hill, A. V. The acid nature of oxyhaemoglobin 544
Hill, T. G., *see* Haas, P.
Hoet, J. Étude de l'alimentation artificielle chez le pigeon et de la déficience en vitamines 220
Hoffert, D., *see* Smedley MacLean, I.
Holden, H. F. The effect of a yeast extract on the oxygen consumption of washed frog muscle 361
Hormone, anti-diabetic, formation of, by a bacillus (Hutchinson, Smith and Winter) 764
Hormone, anti-diabetic, preparation of, from yeast (Hutchinson, Winter and Smith) 683
Hume, E. M. and Smith, H. H. The effect of air, which has been exposed to the radiations of the mercury-vapour quartz lamp, in promoting the growth of rats, fed on a diet deficient in fat-soluble vitamins 364
Husband, A. D., Godden, W. and Richards, M. B. The influence of cod-liver oil, linseed oil and olive oil on the assimilation of calcium and phosphorus in the growing pig 707
Hutchinson, H. R., Smith, W. and Winter, L. B. Studies on carbohydrate metabolism. II. On the preparation of an anti-diabetic hormone from yeast. Part I 683
Hutchinson, H. B., Smith, W. and Winter, L. B. Studies on carbohydrate metabolism. III. On the formation of an anti-diabetic hormone by the action of a bacillus. (Preliminary communication.) 764
Hydrogen ion concentration of blood, accuracy of Dale and Evans method of determining (Taylor) 406
Hydrogen ion concentration of blood in pathological conditions (Parsons and Poulton) 341

Iminazole ring, heat-stable catalyst in animal tissues which destroys the (Clifford) 549
Iminazolylglycine, synthesis of (Stewart) 130
Indole derivatives, absorption spectra of some (Ward) 891
Indolepropionic acid, fate of, in animal organism (Ward) 907
Inositol, estimation of (Needham) 422
Insulin, effect of, on glycogen of tissues (Dudley and Marrian) 435
Insulin, heat production in frog's muscle, not affected by (Azuma and Hartree) 875
Insulin, properties and purification of (Dudley) 376
Insulin, solubility of (Widmark) 668
Iron, effect of deficiency of, in diet, on pigs (McGowan and Crichton) 204
Irradiated air, effect of, on growth of rats on a diet deficient in fat-soluble vitamins (Hume and Smith) 364

Kay, H. D. The reversibility of the action of urease of soy bean 277
Kay, H. D., and Zilva, S. S. The alleged specific colour reaction for the antiscorbutic factor 872

KERMACK, W. O., *see* WRIGHT, H. D.
KING, G., *see* GARDNER, J. A.
KNAGGS, J. Some notes on the determination of the Hausmann numbers of proteins 488
KNAGGS, J., MANNING, A. B. and SCHRYVER, S. B., Investigations on gelatin. Part II. Researches on the methods of purifying gelatin 473
KORENCHEVSKY, V. and CARR, M. Influence of a milk diet on the skeleton 187
KORENCHEVSKY, V. and CARR, M. The influence of the antenatal feeding of parent rats upon the number, weight and composition of the young at birth 597
Kynurenic acid, absorption spectra of (Ward) 903

Lead, absorption and translocation of, by plants (Hevesy) 439
Lecithins, function of, in respiration in plants (Gallagher) 515
Lemon juice, antiscorbutic factor of, influence of reaction on oxidation of (Zilva) 410
LEVY-SIMPSON, S. and CARROLL, D. C. The estimation of ammonia and urea in urine and other fluids 391
Light rays, supplementary value of, to diet graded in content of fat-soluble factor (Goldblatt and Soames) 622
LING, A. R. and NANJI, D. R. On the presence of maltase in germinated and ungerminated barley 593
Linseed oil, influence of, on calcium and phosphorus assimilation in growing pig (Husband, Godden, and Richards) 707
Lipochromes, of plants, association of vitamin *A* with (Coward) 145
Liver oils, sulphuric acid test for (Harden and Robison) 115

MCGOWAN, J. P. and CRICHTON, A. On the effect of deficiency of iron in the diet of pigs (Preliminary communication.) 204
Maltase in germinated and ungerminated barley (Ling and Nanji) 593
MANNING, A. B., *see* KNAGGS, J.
MARRACK, J. The balance of anions and kations in the plasma in nephritis 240
MARRIAN, G. F., *see* DUDLEY, H. W.
MARSTON, H. R. The azine and azonium compounds of the proteolytic enzymes. I 851
Methaemoglobin, oxygen content of (Roaf and Smart) 579
Methylene blue, reduction of, by tissue extracts (Wishart) 103
Milk, cow's, sterol content of (Fox and Gardner) 94
Milk diet, influence of, on skeleton (Korenchevsky and Carr) 187
Milk, reducing and oxidising reactions in (Haas and Hill) 672
MITSUDA, T. The distribution of carnosine in the muscles of the normal and decerebrate cat 630
MORGAN, G. T., COOPER, E. A., and BURTT, A. The bactericidal action of tellurium derivatives of certain aliphatic β-diketones 30
MOTTRAM, E. C., *see* HARTWELL, G. A.
MOTTRAM, V. H., *see* HARTWELL, G. A.
Muscle, frog's, washed, effect of yeast extract on oxygen consumption of (Holden) 361
Muscles of normal and decerebrate cat, distribution of carnosine in (Mitsuda) 630

NANJI, D. R. An iodometric method for the estimation of nitrogen in osazones 761
NANJI, D. R., *see also* LING, A. R.
NEEDHAM, J. Studies on inositol. I. A method of quantitative estimation 422
NEEDHAM, J. A note on the estimation of the carbon-content of solutions 431
Nephritis, ammonia content of blood in (Russell) 72
Nephritis, balance of anions and kations in plasma in (Marrack) 240
Nesslerisation, avoidance of turbidity during (Stanford) 844

Oak, American white, hemicellulose of (O'Dwyer) 501
Obituary notice of Onslow, V. A. H. H. 1
O'DWYER M. H. The hemicelluloses. III. The hemicellulose of American white oak 501
Olive oil, influence of, on calcium and phosphorus assimilation in growing pig (Husband, Godden and Richards) 707
ONSLOW, H. The relation between uric acid and allantoin excretion in hybrids of the Dalmatian hound 334
ONSLOW, H. Uric acid and allantoin excretion among offspring of Dalmatian hybrids 564
ONSLOW, H., obituary notice of 1
ONSLOW, M. WHELDALE. Oxidising enzymes. VI. A note on tyrosinase 216
Ossification, significance of hexosephosphoric esters in (Robison) 286
Oxidation, in plants, mechanism of (Gallagher) 515
Oxidising enzymes (Wheldale Onslow) 216
Oxidising reaction in milk (Haas and Hill) 672
Oxygen, dissolved, of the Thames estuary water, seasonal variation in (Butler and Coste) 49
Oxygenase of Bach and Chodat (Gallagher) 515
Oxyhaemoglobin, acid nature of (Hill) 544

PARSONS, T. R. and POULTON, E. P. The hydrogen ion concentration of the blood in certain pathological conditions, as determined by the hydrogen electrode and the indirect methods of Barcroft and Hasselbalch 341
Partheno-genesis, artificial in sea-urchins (Frost) 418
Pectin and "protopectin" (Tutin) 510
Pectin, hydrolysis of (Tutin) 83
PETERS, R. A. and WALKER, E. Rate of liberation of acid by $\beta\beta'$-dichlorodiethyl sulphide and its analogues in its relation to the "acid" theory of skin vesication 260
Phosphorus assimilation in growing pig, influence of oils on (Husband, Godden and Richards) 707
Phosphorus, inorganic, of blood of children (Anderson) 43
PICKERING, J. W. and SOUZA, J. H. DE. The fluidity and coagulation of the blood 747
PICKERING, J. W. and TAYLOR, F. E. Colloids and haemolysis 916
Pig, effect on, of deficiency of iron in diet (McGowan and Crichton) 204
Pig, growing, influence of oils on calcium and phosphorus assimilation in (Husband, Godden and Richards) 707
Pigeons, experimental diet for (Hoet) 220

Pike, respiratory exchange in (Gardner and King) 170
Plant tissues, vitamin *A* in, formation of (Coward) 134
Plants, absorption and translocation of lead by (Hevesy) 439
Plants, oxidation in, mechanism of (Gallagher) 515
Plimmer, R. H. A. and Rosedale, J. L. The rearing of chickens on the intensive system. Part III. *B*-vitamin requirements. Comparison of yeast extracts and dried yeast. (With the assistance of W. H. Raymond.) 772
Plimmer, R. H. A. and Rosedale, J. L. The rearing of chickens on the intensive system. Part IV. *C*-vitamin requirements of chickens and other birds. (With the assistance of W. H. Raymond.) 787
Plimmer, R. H. A. and Rosedale, J. L. The rearing of chickens on the intensive system. Part V. Comparative *B*-vitamin requirements of pigeons, chickens and other birds. (With the assistance of W. H. Raymond.) 794
Poisoning, mechanism of, and adsorption (Seth) 613
Poisons, irritant, adsorption of (Seth) 613
Polyphenols, reagent for, preparation of (Bezssonoff) 420
Poulton, E. P., *see* Parsons, T. R.
Pregnancy, calcium content of blood during (Widdows) 34
Proteins, determination of Hausmann numbers of (Knaggs) 488
Proteins, relations of, to halogen phenols (Cooper and Woodhouse) 600
Protopectin (Tutin) 510

Quastel, J. H., Stewart, C. P. and Tunnicliffe, H. E. On glutathione. IV. Constitution 586
